

## Research Interests

Deep Learning for Computer Vision, 3D Computer Vision, Scene Understanding, Image/Video Processing, View Synthesis, Structure-from-Motion, SLAM, Local Invariant Feature, Interactive Vision Techniques

## Education

**University of Maryland, College Park**  
Ph.D. in Computer Science

Maryland, US  
Sep. 2022–present

- Advisor: Jia-Bin Huang

**National Taiwan University**  
Master of Science in Computer Science and Information Engineering

Taipei, Taiwan  
Sep. 2018–Jun. 2020

- Thesis: “3D Video Stabilization with Depth Estimation by CNN-based Optimization” **[CVPR2021]**  
Committee: Yi-Ping Hung (advisor), Yung-Yu Chuang, Yu-Chiang Frank Wang, Chu-Song Chen, Kuan-Wen Chen
- Cumulative GPA: 4.24/4.3 (rank 7th/132)

**National Chiao Tung University** (now National Yang Ming Chiao Tung University)  
Bachelor of Science in Computer Science (Network and Multimedia Engineering Program)

Hsinchu, Taiwan  
Sep. 2014–Jun. 2018

- Cumulative GPA: 4.14/4.3 (rank 1st/50)
- Academic Achievement Award: 4 times (top 5% ranking in 4 semesters)

## Publications

## Research Experiences

### **AI Application and Integration Lab at Academia Sinica**

Research Assistant advised by Prof. Chu-Song Chen

Taipei, Taiwan

Sep. 2020–Mar. 2022

- Developing globally consistent video dense depth and camera pose estimation with a CNN-based optimization framework, which outperformed the state-of-the-art by 19% improvement with strong efficiency. **[In submission]**
- Leading a research team to develop video view synthesis with style transfer using 3D geometric constraints.
- Leading a team of Traditional Chinese scene text detection and recognition in self-supervised learning manners; and developing scene text synthesis algorithms with depth estimation and scene text replacement.
- Contributed in a multi-view multi-human 3D pose estimation and tracking system with 100 fps. **[CVPRW 2021]**
- Solved CT metal artifact reduction in CT-MRI paired images by leveraging conditional GAN and contrastive loss.
- Developed multiple scale image deblurring and denoising, for different scales of microscopy images.

### **Interdisciplinary Human-AI Interaction Research Project**

Research Assistant

Taipei, Taiwan

Jul. 2020–Aug. 2020

- Advised by Prof. Yihsiu Chen (Communication, NCCU, Taiwan), Prof. Gary Hsieh (Human Centered Design & Engineering, UW, Seattle). and Prof. Chien-Wen Tina Yuan (Library & Information Studies, NTNU, Taiwan).
- Developed experimental platforms of human-AI collaboration to serve over 700 participants. **[In submission]**

### **Image and Vision Lab at National Taiwan University, collaborating with MediaTek, Inc.**

Graduate Research Assistant advised by Prof. Yi-Ping Hung

Taipei, Taiwan

Sep. 2018–Jun. 2020

- Proposed the first 3D learning-based video stabilization algorithm with self-supervised depth and pose estimation. The method consistently outperforms the state-of-the-art methods, especially in challenging videos. **[CVPR2021]**
- Proposed an online video stabilization algorithm with a coarse-to-fine approach, which achieved 54.6 fps and surpassed the state-of-the-art by 29% with robust shape preservation. **[ICIP2021]**
- Developed self-supervised monocular depth and camera ego-motion estimation for wild videos.
- Conducted thorough evaluations on the performance of local feature algorithms for visual SLAM systems.

### **Collaborative Vision Lab at National Chiao Tung University**

Undergraduate Research Assistant advised by Prof. Kuan-Wen Chen

Hsinchu, Taiwan

Aug. 2016–Jun. 2018

- Developed UAV autopilot and visual tracking system with OCR and human detection. **[TAICHI2017]**
- Contributed in a navigation system for visually impaired with streaming semantic segmentation. **[TAICHI2018]**
- Constructed a semi-automatic feature correspondence annotation system to construct a real-world dataset of matching patches for a learning-based viewpoint- and illumination-invariant local feature extraction.
- Developed semantic segmentation and SLAM system with 3D reconstruction for virtual reality environments.

## Teaching

- **Teaching Assistant**, 3D Computer Vision with Deep Learning Applications (CSIE5429), NTU Spring 2021
- **Teaching Assistant**, Digital Image Processing (CSIE5612), NTU Fall 2019
- **Teaching Assistant**, Probability (CSIE2121), NTU Spring 2019
- **Teaching Assistant**, Computer Vision for UAV Autopilot (DCP1249), NCTU Spring 2018

## Awards and Achievements

- **Reviewer**, Pattern Recognition
- **Academic Achievement Award** × 4, (Top 5% ranking)  
Fall 2014, Spring 2016, Fall 2016, and Spring 2017
- **Excellence Award**, Undergraduate Project Competition  
An UAV autopilot system for sports player tracking
- **Departmental Core Course Scholarship**  
Top 3 ranking in the course of Operating System

## Skills

- **Programming Languages:**  
Python, C/C++,  $\text{\LaTeX}$ , MatLab, Bash, Javascript, PHP, SQL, C#, Swift
- **Development Tools:**  
Unix, PyTorch, OpenCV, Open3D, COLMAP, OpenGL, TensorFlow, Git, Unity
- **Languages:**  
Chinese (native), English (fluent, TOEFL MyBest: 105)
